# DAVID RUIZ URRACA

**Senior Mobile Engineer · Android & Flutter · Kotlin Multiplatform · SDK & Platform Architecture · AI Product Builder**

+34 644 627 262 · david@ruizurraca.com · linkedin.com/in/davidru85 · davidru85.github.io

**Available for Remote Roles**

## PROFESSIONAL SUMMARY

Product-minded **Senior Mobile Engineer** building **production mobile systems since 2015** — native Android applications, **Android SDKs**, Flutter products, and **Kotlin Multiplatform** shared layers. I own delivery end to end: architecture, **API and SDK contracts**, backward compatibility, privacy and consent, testing, CI/CD, release engineering, analytics and payments. At OLX Group I owned an internal **Android Ads SDK** across three consumer verticals, serving **tens of millions of users** across market-specific builds. Currently Technical Lead & sole developer of **Explora Prado** (Flutter), **live on the App Store & Google Play** and in active development. Core practices: **TDD**, **experimentation**, and **AI-assisted development** (Claude Code, Cursor, Codex, Ollama).

## SELECTED IMPACT

- **Mobile platform ownership** — owned the Android Ads SDK lifecycle at OLX Group (API & versioning strategy, backward compatibility, privacy & consent, AAR packaging, Maven publication, partner-team enablement) across three verticals serving **tens of millions of users**.
- **Quality improvement** — raised Android Ads SDK test coverage from **14% to 70%** (JUnit, MockK, Robolectric, Espresso, MockWebServer, JaCoCo; Detekt & ktlint enforcing quality).
- **End-to-end product delivery** — built and operate Explora Prado's full technical platform: Flutter apps for Android & iOS, Firebase, in-app purchases, release pipelines and live store releases.
- **Long-term technical impact** — led Wegow's ground-up Kotlin/Dagger 2 rebuild; that v2 still underpins the company's product six years after my departure.

## CORE SKILLS

| | | | |
|---|---|---|---|
| **Languages** | **Kotlin (Expert)**, Java, Dart, Swift (Familiar), TypeScript (Familiar), JavaScript (Familiar), XML, JSON | **Architecture & DI** | **Clean Architecture (Expert)**, MVVM (Expert), MVI, MVP, Coroutines & Flow (Expert), Hilt (Expert), Dagger 2 (Expert), Koin |
| **Android UI & Performance** | **Jetpack Compose (Expert)**, Material Design, Material 3 Expressive, accessibility, XML layouts, Android TV (Leanback), ExoPlayer, WorkManager, Timber, Baseline Profiles, Macrobenchmark, startup optimization, R8 | **Networking & Data** | Retrofit (Expert), OkHttp, GraphQL, Ktor, Gson, Jackson, kotlinx.serialization, Room (Expert) |
| **SDK & Platform** | **API & SDK design (Expert)**, versioning & backward compatibility, api/impl modularisation, Gradle (Kotlin DSL) (Expert), version catalogs, convention plugins, composite builds, AAR, Maven Publish (Expert), Artifactory, GitHub Actions, Fastlane | **Testing & Quality** | **TDD (Expert)**, JUnit (Expert), MockK (Expert), Espresso, Robolectric, Roborazzi (screenshot testing), contract testing, MockWebServer, JaCoCo, Detekt, ktlint |
| **Privacy & Consent** | GDPR (Expert), IAB TCF, Google UMP, Android Privacy Sandbox (Topics, Protected Audience, Attribution Reporting) | **Cross-platform & On-device** | Flutter / BLoC, Kotlin Multiplatform, Compose Multiplatform, SwiftUI (Familiar), Liquid Glass (Familiar), React Native (Familiar), Health Connect API, AICore (on-device Gemini Nano), on-device TTS & STT |
| **Cloud, Payments & Analytics** | Firebase suite (Expert), `in_app_purchase` `Stripe` `Redsys` (purchase verification & entitlement persistence), Amplitude, CleverTap, Google Analytics, Crashlytics, Twilio | **AI-Assisted Dev** | **Claude Code (daily)**, Cursor, Codex, Ollama, MCP Servers, AI Skills / custom skill packages, AGENTS.md / DESIGN.md patterns |
| **Tools & Methods** | Git (Expert), CI/CD, JIRA, Agile / Scrum / Kanban, A/B testing, Remote Config, feature flags, Android Studio, Xcode (Familiar), VS Code, Figma, ADRs | | |

## PROFESSIONAL EXPERIENCE

**Technical Lead — Explora Prado (Flutter app, Museo del Prado)** **Jan 2026 – Present**

*Spain (Remote) · Art-Tech 2025 Honorable Mention · Santander X Explorer 2026*

- Own the full technical platform as sole developer: architecture (Clean Architecture + BLoC) on Firebase, implementation, release pipeline, and the **live releases on the App Store & Google Play**.
- Built the **in-app purchase layer** for both stores: purchase verification and **entitlement persistence**, products live in both stores.
- Built dynamic localisation (ES/EN live, IT/FR/PT planned), adaptive UI for a content-heavy museum experience, and the internal content back office in Flutter Web.
- Developed quizzes, multimedia guides, payment flows and offline sync with **TDD**; run **Firebase A/B tests** on onboarding and **conversion flows**.
- Scale solo delivery via an **AI-first workflow** (Claude Code, Cursor, custom skill packages, AGENTS.md / DESIGN.md).

**Senior Android Engineer — OLX / Letgo (Android Ads SDK platform)** **Jul 2021 – Jan 2026**

*Barcelona / New Delhi / Poznań / Lisbon (Remote) · Kotlin*

- Owned the **internal Android Ads SDK as a mobile platform**, powering monetisation across OLX's three consumer verticals, serving **tens of millions of active users** — integrating Google Ad Manager & third-party ad-network SDKs.
- Technical lead & sole Android engineer for most of the SDK's lifecycle; led a temporarily expanded team during higher-load periods.
- Designed a modular **api/impl module separation** enforcing strict dependency boundaries — improved build times and made partner-team integrations safer; standardised builds with Gradle convention plugins & version catalogs.
- Drove privacy-first decisions: **GDPR** consent (IAB TCF, Google UMP), scoped tracking, Android Privacy Sandbox (Topics, Protected Audience, Attribution Reporting).
- Led migration of critical SDK surfaces from XML to **Jetpack Compose** and from callbacks to **Coroutines & Flow**, maintaining backward compatibility.
- Applied **TDD** across the SDK (JUnit, MockK, Robolectric, Espresso, MockWebServer, JaCoCo); enforced quality with Detekt & ktlint.
- Coordinated with the iOS SDK team on API designs, telemetry schemas and release lifecycles; ran **A/B tests** validating ad placements, formats and SDK changes against monetisation metrics.

**Senior Android Developer — Wegow (Live-music ticketing)** **Sep 2019 – Jul 2021**

*Madrid (Remote) · Kotlin · Sole Android owner*

- Led a ground-up rebuild in **Kotlin** (Dagger 2, MVVM / Clean Architecture) replacing a legacy Java/Dagger 1 app.
- Integrated **Stripe & Redsys payment gateways** for ticket purchases and Google Maps SDK for event discovery.
- Built with Room, LiveData, ViewModels, Coroutines; Firebase for push, analytics, Crashlytics. Practiced **TDD** throughout the rebuild.
- Coordinated with iOS to align feature contracts, analytics schemas, and release cycles. **A/B tested** UX & conversion changes.

**Android Developer — Instantgo (On-demand services marketplace)** **Jul 2018 – Sep 2019**

*Madrid (Remote) · Kotlin · Built app from scratch*

- Built the Android app from scratch to feature parity with iOS; integrated paid 1:1 **video calls (Twilio)** and **Stripe** payments for booking.
- Firebase ecosystem (Auth, Realtime DB, Cloud Functions, Storage, Analytics, Crashlytics) with Dagger 2, Kotlin, MVVM / Clean Architecture (Retrofit, Room, LiveData).
- Ran **A/B tests via Firebase** to optimise booking & session-conversion flows.

**Android Developer — Earlier Roles (2015–2018)** **Sep 2015 – Jul 2018**

*Madrid · Telefónica (Android TV / Movistar TV) · UXSmobile (Evo Banco, banking sector) · Mobile One2One (Carrefour, Alsa, Iberostar) · AvantGarde IT (Indra, DGT)*

- Delivered native Android apps across enterprise, public-sector and agency clients, progressing from Java/AsyncTasks to Kotlin/Clean Architecture/MVP.

## SIDE PROJECTS

**Personal Health App (Android) — In Development**

- Privacy-first **Health Connect** app pairing **on-device AI** (AICore / Gemini Nano) with cloud AI — local-first by design.

**Kotlin Multiplatform Portfolio Projects — Android & iOS, public on GitHub**

- **carApp** (in development): offline-first vehicle-cost tracker; KMP shares domain, data, sync and presentation logic behind native **Jetpack Compose + SwiftUI**, on **SQLDelight** with Firebase backup, TDD and protected CI — github.com/davidru85/carApp
- **Multiverse Explorer**: Rick and Morty API client — one shared Kotlin core behind **Compose + Material 3 Expressive** and **SwiftUI + Liquid Glass**; 13 Clean Architecture modules, REST + GraphQL (Ktor), 1,550+ tests — github.com/davidru85/RickAndMorty

## EDUCATION

**B.Sc. Computer Science — Information Systems Management**

Universidad de La Rioja, Spain · Graduated 2012

Final Year Project on Android — Grade: 9/10

## LANGUAGES

| | |
|---|---|
| **Spanish** | Native |
| **English** | Professional working proficiency — years of daily use in international teams |
| **Portuguese** | Elementary |

## INTERESTS

- **360° Photography & Video** (Insta360 X4) · **Motorcycling & Travel** · **Running & CrossFit** · **Tech & Home Automation** · **Music** · **Movies & Series**.
