

DAVID RUIZ URRACA

Senior Mobile Engineer · Android · Flutter · KMP · AI Product Builder

+34 644 627 262 · david@ruizurraca.com · linkedin.com/in/davidru85 · davidru85.github.io

AVAILABLE FOR REMOTE ROLES

PROFESSIONAL PROFILE

Product-minded Senior Mobile Engineer building production Android applications at scale since 2015, with a strong cross-platform track record in Flutter and active Kotlin Multiplatform adoption. Currently Technical Lead and sole developer of Explora Prado (Flutter), a recognised Museo del Prado app (Art-Tech 2025 Honorable Mention; Santander X Explorer 2026). Previously owned an internal Android Ads SDK end-to-end at OLX Group — versioning, backward compatibility, GDPR consent, and integration ergonomics across OLX's three consumer verticals serving tens of millions of users. Strong advocate of Test-Driven Development and AI/agentic engineering workflows (Claude Code, Cursor, Codex, Ollama), and builds health & on-device AI features with the Health Connect API and Android's AI Core (on-device Gemini Nano), plus on-device TTS & STT. Also building a Kotlin Multiplatform app for a real dog-boarding business — sharing domain/data across native Android (Jetpack Compose) and iOS (SwiftUI), with AI-powered pet recognition on the roadmap.

PROFESSIONAL EXPERIENCE

Technical Lead

Jan 2026 – Present

Explora Prado · Spain (Remote)

A recognised Flutter app turning Museo del Prado's permanent collection into a self-guided digital experience (Art-Tech 2025 Honorable Mention · Santander X Explorer 2026).

- Sole owner of the full technical platform: architecture, implementation, release pipeline, and the upcoming App Store / Google Play launch.
- Built end-to-end on Flutter/Dart for Android and iOS with Clean Architecture + BLoC, backed by Firebase (Firestore, Storage, Auth, Analytics, Crashlytics).
- Implemented the in-app purchase layer for both stores (`in_app_purchase`) — purchase verification and entitlement persistence; store-side configuration in progress ahead of launch.
- Built dynamic multi-language support (Spanish & English live; Italian, French, Portuguese planned) and adaptive UI with SVG assets and Flutter Web.
- Developed core features (interactive quiz, multimedia guides, payment flows) with TDD; ran A/B tests via Firebase to refine onboarding and conversion; scaled solo output through an AI-first workflow (Claude Code, Cursor, AGENTS.md / DESIGN.md patterns).

Senior Android Engineer

Jul 2021 – Jan 2026

OLX / Letgo · Barcelona (Remote)

Android development for a leading global marketplace operating in Poland, Portugal, Turkey, India, Indonesia, and LATAM.

- Technical lead and architect of the internal Android Ads SDK powering monetisation across OLX's three consumer verticals (Horizontal, Real Estate & Motors), each shipping market-specific builds, serving tens of millions of users.
- Designed an `api / impl` module separation enforcing strict dependency boundaries — improved build times; standardised the build with Gradle convention plugins, version catalogs, and composite builds.
- Drove privacy-first decisions: consent management (IAB TCF, Google UMP), scoped tracking, GDPR and Android Privacy Sandbox compliance.
- Led migration from XML to Jetpack Compose and from callback-based `async` to Kotlin Coroutines & Flow, while maintaining backward compatibility.
- Designed SDK APIs with TDD (JUnit, MockK) — raised SDK test coverage from 14% to 70%, with zero regression across host apps.
- Ran A/B tests and experiments to validate ad placements, formats, and SDK changes against monetisation and engagement metrics.
- Integrated GraphQL APIs for data fetching and wrote my first Flutter code here, alongside the native Android work — a foundation later deepened on Explora Prado.
- Owned SDK lifecycle: versioning, AAR packaging and publication via Maven Publish to Artifactory and Maven Central, documentation, and partner-team mentoring.

Senior Android Developer

Sep 2019 – Jul 2021

Wegow · Madrid (Remote)

Live-music events discovery and ticketing platform; joined as the company's only Android developer.

- Inherited a legacy Java/Dagger 1 codebase; stabilised it and shipped new features during an initial support phase.
- Led and built a ground-up rebuild ("v2") in Kotlin with Dagger 2 on MVVM / Clean Architecture — a foundation that still underpins the company's product today, 6 years after my departure.
- Built with Room, LiveData, ViewModels, Coroutines, Glide, and Firebase (push, analytics, Crashlytics); integrated Stripe & Redsys payments and the Google Maps SDK.
- Applied TDD throughout the rebuild, used A/B testing to validate UX and conversion changes, and coordinated directly with iOS to unify product behaviour across both platforms.

Android Developer

Instantgo · Madrid (Remote)

On-demand services marketplace — paid hourly sessions, mostly via 1:1 video call, with in-person services too; user base concentrated in California.

• Built the Android app from scratch and brought it to feature parity with the iOS app, with full technical autonomy (Kotlin + MVVM / Clean Architecture, Retrofit, Room, LiveData, Glide).

• Integrated paid 1:1 video calls with Twilio and the in-app payment flow with Stripe; ran A/B tests via Firebase to optimise booking and session conversion.

• Integrated the Firebase ecosystem (Auth, push, analytics, Crashlytics, Realtime Database, Storage, Cloud Functions, App Distribution) with Dagger 2.

Jul 2018 – Sep 2019

EARLIER EXPERIENCE

Android Developer · Telefónica · Madrid

Mar 2018 – Jul 2018

Movistar TV on Android TV — D-pad navigation, Leanback UI, ExoPlayer; A/B-tested UI variants; MVP and Kotlin in a Scrum team.

Android Developer · UXSmobile · Madrid

Dec 2017 – Mar 2018

BMI – Evo Banco app with Clean Architecture + MVP in Kotlin; Retrofit and Room under banking-sector standards.

Android Developer · Mobile One2One · Madrid

Nov 2016 – Dec 2017

Native Android apps for enterprise clients (Carrefour, Alsà, Iberostar, Baleària, Melià) in Java/Kotlin — MVP, Retrofit, Realm.

Android Developer · AvantGarde IT Services · Madrid

Sep 2015 – Nov 2016

Client-facing Android apps in Java for public-sector and enterprise clients (Indra, DGT, Atenzia, Brightstar).

TECHNICAL SKILLS

Languages	Kotlin · Java · Dart · XML · JSON
Android	Jetpack Compose · Coroutines & Flow · Clean Architecture · MVVM / MVI · Hilt / Dagger 2 · Room · Retrofit / Ktor · GraphQL · WorkManager · Material Design · Android TV · Health Connect · AICore (Gemini Nano) · on-device TTS/STT
Testing & Build	TDD · JUnit · MockK · Espresso · Robolectric · JaCoCo · Detekt / ktlint · Gradle (Kotlin DSL) · GitHub Actions · Maven Publish / Artifactory
Flutter & KMP	BLoC · Riverpod · in_app_purchase · Firebase / Firestore · Flutter Web · Platform Channels · Kotlin Multiplatform (shared domain/data) · Compose Multiplatform · SwiftUI (native iOS) · SQLDelight
Privacy & Cloud	GDPR · Android Privacy Sandbox · IAB TCF · Google UMP · Firebase Suite · Google Ads SDK · Amplitude · CleverTap · A/B Testing
AI Tooling	Claude Code · Cursor · Codex · Ollama · MCP · AGENTS.md / DESIGN.md patterns

EDUCATION

B.Sc. Computer Science (Information Systems Management)

Universidad de La Rioja · Spain · Graduated 2012

Final Year Project on the Android platform — Grade: 9/10

LANGUAGES

Spanish	Native
English	Professional working proficiency
Portuguese	Elementary

SPEAKING & OPEN SOURCE

- **Internal Talks & Training:** delivered internal talks and hands-on training at companies I've worked for — Kotlin adoption, clean architecture, and modern Jetpack libraries.

• **Open Source:** small contributions to open-source projects — reviewing pull requests, helping with translations, and acting as a tester.

• **Internal SDK Guidelines & Documentation:** authored internal playbooks for SDK integration, GDPR consent management, and modular library architecture.

INTERESTS

- **360° Photography & Video:** passionate about immersive 360° capture and an active Insta360 X4 user — I love reliving my trips in full 360° and getting the angles a normal camera can't.

• **Motorcycling & Travel:** happiest on two wheels and always up for a new road — most of my motorcycle trips and vacations end up being the reason I pick up the 360° camera.

• **Running & CrossFit:** staying active with regular running and CrossFit — it keeps the discipline and energy that carry over into how I work.

• **Tech & Home Automation:** a tinkerer at heart — building and automating my smart home and playing with new gadgets, hardware, and anything I can take apart and improve.

• **Music:** a constant soundtrack to my day — always digging into new music and rarely code, ride, or travel without something playing.

• **Movies & Series:** winding down with a good film or series — drawn equally to a gripping story and to anything with striking visuals.
