Available for Remote Roles

PROFESSIONAL SUMMARY

Product-minded **Senior Mobile Engineer** building production Android apps at scale since 2015 — originally in Java, with **Kotlin** as primary language since 2018 — with a strong cross-platform track record in Flutter and active Kotlin Multiplatform adoption. Owned an internal **Android Ads SDK end-to-end** at OLX Group — modular api/impl architecture, GDPR consent flows, and reusable platform foundations serving **tens of millions of users** across market-specific builds. Currently Technical Lead & sole developer of **Explora Prado** (Flutter), now **live on the App Store & Google Play**, including its in-app purchase and subscription entitlement layer for both stores. Passionate advocate of **TDD, experimentation, and AI-assisted development** (Claude Code, Cursor, Codex, Ollama) as core engineering practices. Strong track record of cross-functional collaboration with product, design, and platform teams across international organizations.

CORE SKILLS

Languages	Kotlin (Expert), Java, Dart, TypeScript (F), JavaScript (F), XML, JSON	Architecture	Clean Architecture (E), MVVM (E), MVI, MVP, Coroutines & Flow (E)
Android UI	Jetpack Compose (E), Material Design, XML layouts, Android TV (Leanback), ExoPlayer, WorkManager, Timber	DI	Hilt (E), Dagger 2 (E), Koin
Testing & Quality	TDD (E), JUnit (E), MockK (E), Espresso, Robolectric, MockWebServer, JaCoCo, Detekt, ktlint	Networking & Data	Retrofit (E), OkHttp, GraphQL, Ktor, Gson, Jackson, kotlinx.serialization, Room (E)
Subscriptions / Payments	<code>in_app_purchase</code> <code>Stripe</code> <code>Redsys</code> purchase verification & entitlement persistence	Experimentation	A/B testing, Firebase Remote Config, feature flags, conversion-flow optimization
SDK & Build	Gradle (Kotlin DSL, E), version catalogs, convention plugins, Maven Publish (E), Artifactory, AAR, GitHub Actions, Fastlane	Performance	Baseline Profiles, Macrobenchmark, startup optimization, R8
AI-Assisted Dev	Claude Code (daily), Cursor, Codex, Ollama, MCP Servers, AI Skills / custom skill packages, AGENTS.md / DESIGN.md patterns	Privacy & Consent	GDPR (E), IAB TCF, Google UMP, Android Privacy Sandbox
Cloud & Analytics	Firebase suite (E), Amplitude, CleverTap, Google Analytics, Crashlytics, Twilio	Cross-platform	Flutter / BLoC, Kotlin Multiplatform, Compose Multiplatform, SwiftUI, React Native (F)
On-device & Health	Health Connect API, AICore (on-device Gemini Nano), on-device TTS & STT	Tools & Methods	Git (E), CI/CD, JIRA, Agile / Scrum / Kanban, Android Studio, VS Code

PROFESSIONAL EXPERIENCE

Technical Lead — Explora Prado (Flutter app, Museo del Prado) <i>Spain (Remote) · Art-Tech 2025 Honorable Mention · Santander X Explorer 2026</i>	Jan 2026 – Present
- Sole owner of the full platform: architecture, implementation, release pipeline, and the live releases on the App Store & Google Play. - Built the in-app purchase & subscription layer for both stores (<code>in_app_purchase</code>) — purchase verification flow and entitlement persistence, a non-trivial native integration on Android & iOS, with store-side products live. - Designed reusable, layered architecture (Clean Architecture + BLoC, DTO / Entity / Model) backed by Firebase (Firestore, Storage, Auth, Analytics, Crashlytics). - Built dynamic multi-language support (ES/EN live, IT/FR/PT planned) and adaptive UI for a content-heavy museum experience, plus the internal content back-office in Flutter Web. - Developed core features (quiz system, multimedia guides, payment flows) using TDD for robust offline sync and reliability. - Ran A/B tests via Firebase to experiment with onboarding, content presentation, and conversion flows. - Scaled output as a solo developer via an AI-first workflow (Claude Code, Cursor, custom skill packages, AGENTS.md / DESIGN.md, MCP Servers, Figma, AI Skills).	

Barcelona / New Delhi / Poznań / Lisbon (Remote) · Kotlin

- Architected & maintained the **internal Android Ads SDK** powering monetisation across OLX's three consumer verticals, serving **tens of millions of active users** — integrating Google Ad Manager & third-party ad-network SDKs.
- Technical lead & sole Android engineer for most of the project's life; led a temporarily expanded team during higher-load periods.
- Designed a modular **api/impl module separation** enforcing strict dependency boundaries — improved build times and made partner-team integrations safer; standardised builds with Gradle convention plugins & version catalogs.
- Drove privacy-first decisions: **GDPR** consent (IAB TCF, Google UMP), scoped tracking, Android Privacy Sandbox (Topics, Protected Audience, Attribution Reporting).
- Led migration of critical SDK surfaces from XML to **Jetpack Compose** and from callbacks to **Coroutines & Flow**, maintaining backward compatibility.
- Applied **TDD** (JUnit, MockK, Robolectric, Espresso, MockWebServer) — raised SDK coverage from **14% to 70%** (JaCoCo); enforced quality with Detekt & ktlint.
- Owned SDK lifecycle: versioning, AAR packaging, Maven Publish to Artifactory & Maven Central, integration docs, and mentoring partner teams.
- Led cross-platform coordination with the iOS SDK team to sync API designs, telemetry schemas, and release lifecycles.
- Ran **A/B tests & experiments** to validate ad placements, formats, and SDK changes against monetisation & engagement metrics.

Madrid (Remote) · Kotlin · Sole Android owner

- Led a ground-up rebuild in **Kotlin** (Dagger 2, MVVM / Clean Architecture) replacing a legacy Java/Dagger 1 app — a foundation still in production 6 years later.
- Integrated **Stripe & Redsys payment gateways** for ticket purchases and Google Maps SDK for event discovery.
- Built with Room, LiveData, ViewModels, Coroutines; Firebase for push, analytics, Crashlytics. Practiced **TDD** throughout the rebuild.
- Coordinated with iOS to align feature contracts, analytics schemas, and release cycles. **A/B tested** UX & conversion changes.

Madrid (Remote) · Kotlin · Built app from scratch

- Built the Android app from scratch to feature parity with iOS; integrated paid 1:1 **video calls (Twilio)** and **Stripe** payments for booking.
- Firebase ecosystem (Auth, Realtime DB, Cloud Functions, Storage, Analytics, Crashlytics) with Dagger 2, Kotlin, MVVM / Clean Architecture (Retrofit, Room, LiveData).
- Ran **A/B tests via Firebase** to optimise booking & session-conversion flows.

Madrid · Telefónica (Android TV / Movistar TV, ExoPlayer, Leanback) · UXSmobile (Evo Banco, banking-sector Kotlin/Clean Arch) · Mobile One2One (Carrefour, Alsa, Iberostar) · AvantGarde IT (Indra, DGT)

- Delivered native Android apps across enterprise, public-sector, and agency clients; progressed from Java/AsyncTasks (Retrofit, ButterKnife, EventBus) to Kotlin/Clean Architecture/MVP — building foundations in testing, REST integration, and modular feature delivery.

SIDE PROJECTS

Personal Health App (Android) — In Development

- Privacy-first app built around the **Health Connect API**; pairs **on-device AI** (AICore / Gemini Nano) with cloud AI for actionable health guidance — local-first by design.

carApp — Vehicle Cost Tracker (Kotlin Multiplatform) — In Development

- Cross-platform **Android & iOS** vehicle-cost tracker built as a public portfolio project: **Kotlin Multiplatform** shares domain, data, sync and presentation logic while the UI stays native (Jetpack Compose + SwiftUI). Offline-first MVP on **SQLDelight** with Firebase/Firestore backup, TDD, architecture/contract checks and protected GitHub Actions CI — github.com/davidru85/carApp

EDUCATION

B.Sc. Computer Science — Information Systems Management

Universidad de La Rioja, Spain · Graduated 2012
Final Year Project on Android — Grade: 9/10

LANGUAGES

Spanish	Native
English	Professional working proficiency — years of daily use in international teams
Portuguese	Elementary

INTERESTS

- **360° Photography & Video** — active Insta360 X4 user, capturing motorcycle trips & travels in full immersive 360°.
