AVAILABLE FOR REMOTE ROLES

PROFESSIONAL PROFILE

Product-minded Senior Mobile Engineer building production Android applications at scale since 2015, with a strong cross-platform track record in Flutter and active Kotlin Multiplatform adoption. Currently Technical Lead and sole developer of Explora Prado (Flutter), a Museo del Prado app that received an Art-Tech 2025 Honorable Mention and was selected for Santander X Explorer 2026. Previously owned an internal Android Ads SDK end-to-end at OLX Group — versioning strategy, backward compatibility, GDPR consent flows, and integration ergonomics across OLX's three consumer verticals, serving tens of millions of active users. I advocate for Test-Driven Development and generative AI / agentic workflows as core engineering practices (Claude Code, Cursor, Codex, Ollama), and build health & on-device AI features with the Health Connect API and Android's AICore (on-device Gemini Nano), pairing on-device and cloud AI plus local TTS & STT for private, local-first experiences.

PROFESSIONAL EXPERIENCE

Technical Lead

Jan 2026 – Present

Explora Prado · Spain (Remote)

A Flutter app turning Museo del Prado's permanent collection into a self-guided digital experience (Art-Tech 2025 Honorable Mention · Santander X Explorer 2026).

- Sole owner of the full technical platform: architecture, implementation, release pipeline, and the upcoming App Store / Google Play launch.
- Built the app end-to-end on Flutter/Dart for Android and iOS with Clean Architecture + BLoC and a layered data model, backed by Firebase (Firestore, Storage, Auth, Analytics, Crashlytics).
- Implemented the in-app purchase layer for both stores (in_app_purchase) — purchase verification and entitlement persistence; store-side product configuration in progress ahead of launch.
- Built dynamic multi-language support (Spanish & English live; Italian, French, Portuguese planned) and adaptive UI with SVG assets, custom typography, and Flutter Web.
- Developed core features (interactive quiz, multimedia guides, payment flows) with TDD; ran A/B tests via Firebase to refine onboarding and conversion.
- Scaled solo output through an AI-first workflow (Claude Code, Cursor) with custom skill packages, terminal command loops, and structured AGENTS.md / DESIGN.md patterns.

Senior Android Engineer

Jul 2021 – Jan 2026

OLX / Letgo · Barcelona (Remote)

Android development for a leading global marketplace operating across Poland, Portugal, Turkey, Ukraine, Romania, India, Indonesia, South America, and other markets.

- Architected and maintained the internal Android Ads SDK powering monetisation across OLX's three consumer verticals (Horizontals, Real Estate & Motors), each shipping market-specific builds, serving tens of millions of active users — integrating demand via Google Ad Manager and third-party ad-network SDKs.
- Designed an api/impl module separation enforcing strict dependency boundaries — improved build times and safer partner integrations; standardised the build with Gradle convention plugins, version catalogs, and composite builds.
- Drove privacy-first decisions: consent management (IAB TCF, Google UMP), scoped tracking, GDPR and Android Privacy Sandbox compliance (Topics, Protected Audience, Attribution Reporting).
- Led migration from XML to Jetpack Compose and from callback-based async to Coroutines & Flow, maintaining full backward compatibility; applied Baseline Profiles to cut startup jank.
- Designed the SDK APIs with TDD (JUnit, MockK, Robolectric, Espresso, MockWebServer) — raised test coverage from 14% to 70%, with zero regression across host apps.
- Owned SDK lifecycle end-to-end: versioning strategy, AAR packaging and publication via Maven Publish to Artifactory (JFrog) and Maven Central, integration docs, and mentoring partner-app teams.
- Coordinated cross-platform with the iOS SDK team to align API designs, telemetry schemas, and release lifecycles into a unified integration standard for client teams.
- Collaborated closely with international teams across OLX's offices in Istanbul, New Delhi, Poznań, and Lisbon — coordinating integration and delivery across time zones and markets.

Senior Android Developer

Sep 2019 – Jul 2021

Wegow · Madrid (Remote)

Live-music events discovery and ticketing platform; joined as the company's only Android developer.

- Inherited a legacy Java / Dagger 1 codebase built on deprecated libraries; stabilised it and shipped new features during an initial support phase.
- Led and built a ground-up "v2" in Kotlin with Dagger 2 on MVVM / Clean Architecture — a foundation that still underpins the company's product today, 6 years after my departure.
- Built with Room, LiveData, ViewModels, and Coroutines, with Glide and Firebase (push, analytics, Crashlytics); integrated Stripe & Redsys payments and the Google Maps SDK.
- Applied TDD throughout the rebuild, used A/B testing to validate UX and conversion, and coordinated directly with iOS to unify product behaviour across both platforms.

Android Developer

Jul 2018 – Sep 2019

Instantgo · Madrid (Remote)

On-demand services marketplace — paid hourly sessions, mostly via 1:1 video call, with in-person services too; user base concentrated in California.

- Built the Android app from scratch to feature parity with the existing iOS app, with full technical autonomy (Kotlin + MVVM / Clean Architecture, Retrofit, Room, LiveData, Glide).
- Integrated paid 1:1 video calls with Twilio and the in-app payment flow with Stripe; ran A/B tests via Firebase to optimise booking and session conversion.
- Integrated the Firebase ecosystem (Auth, push, analytics, Crashlytics, Realtime Database, Storage, Cloud Functions, App Distribution) with Dagger 2.

EARLIER EXPERIENCE

Android Developer · Telefónica · Madrid Movistar TV on Android TV — D-pad navigation, Leanback UI, ExoPlayer; A/B-tested UI variants; MVP and Kotlin in a Scrum team.	Mar 2018 – Jul 2018
Android Developer · UXSmobile · Madrid BMI – Evo Banco app with Clean Architecture + MVP in Kotlin; Retrofit and Room under banking-sector standards.	Dec 2017 – Mar 2018
Android Developer · Mobile One2One · Madrid Native Android apps for enterprise clients (Carrefour, Alsa, Iberostar, Baleària, Meliá) in Java/Kotlin — MVP, Retrofit, Realm.	Nov 2016 – Dec 2017
Android Developer · AvantGarde IT Services · Madrid Client-facing Android apps in Java for public-sector and enterprise clients (Indra, DGT, Atenzia, Brightstar).	Sep 2015 – Nov 2016

SIDE PROJECTS

- Personal Health App (Android)** · [In Development](#)
- Privacy-first Android app built around the Health Connect API; reads and aggregates health data to generate personal health metrics.
 - Pairs on-device AI (Android AICore / Gemini Nano) with cloud AI to help users interpret their metrics and get actionable guidance.
 - Local-first by design: sensitive health data is processed on-device where possible, with cloud AI reserved for deeper analysis.

TECHNICAL SKILLS

Languages	Kotlin · Java · Dart · XML · JSON
Android	Jetpack Compose · Coroutines & Flow · Clean Architecture · MVVM / MVI · Hilt / Dagger 2 · Room · Retrofit / Ktor · GraphQL · WorkManager · Material Design · Android TV · Health Connect · AICore (Gemini Nano) · on-device TTS/STT
Testing & Build	TDD · JUnit · MockK · Espresso · Robolectric · JaCoCo · Detekt / ktlint · Gradle (Kotlin DSL) · GitHub Actions · Maven Publish / Artifactory
Flutter & KMP	BLoC · Riverpod · in_app_purchase · Firebase / Firestore · Flutter Web · Platform Channels · Kotlin Multiplatform · Compose Multiplatform · SQLDelight
Privacy & Cloud	GDPR · Android Privacy Sandbox · IAB TCF · Google UMP · Firebase Suite · Google Ad Manager · Amplitude · CleverTap · A/B testing
AI Tooling	Claude Code · Cursor · Codex · Ollama · MCP · custom skill packages · AGENTS.md / DESIGN.md patterns

EDUCATION

B.Sc. Computer Science (Information Systems Management)
Universidad de La Rioja · Spain · Graduated 2012
Final Year Project on the Android platform — Grade: 9/10

LANGUAGES

Spanish	Native
English	Professional working proficiency
Portuguese	Elementary

SPEAKING & OPEN SOURCE

- **Internal Talks & Training:** delivered internal talks and hands-on training at companies I've worked for — Kotlin adoption, clean architecture, and modern Jetpack libraries.
- **Open Source:** small contributions to open-source projects — reviewing pull requests, helping with translations, and acting as a tester.
- **Internal SDK Guidelines & Documentation:** authored internal playbooks for SDK integration, GDPR consent management, and modular library architecture.

INTERESTS

- **360° Photography & Video:** an active Insta360 X4 user — I love reliving my trips in full 360° and getting the angles a normal camera can't.
- **Motorcycling & Travel:** happiest on two wheels and always up for a new road — most of my trips end up being the reason I pick up the 360° camera.
- **Running & CrossFit:** I stay active with regular running and CrossFit — it's how I keep the discipline and energy that carry over into how I work.
- **Tech & Home Automation:** a tinkerer at heart — I enjoy building and automating my smart home and anything I can take apart and improve.
- **Music · Movies & Series:** a constant soundtrack to my day, and winding down with a good film or series — drawn equally to a gripping story and striking visuals.
